CONNECT YOUR SENSES

24-25-26 September 2024

Hazera
Growing Together

Dear Customers, Dear Partners,

We are excited and privileged to welcome you to **Hazera's** International Open Days in Warmenhuizen, the Netherlands.

Get ready to **connect your senses**; we invite you to **see, touch** and **taste** our varieties in the field and in the pavilion and to share with us your valuable feedback. **Hear** our global crop experts talk about our highlights and **experience** our planting and harvesting demonstrations.

The focus will be on some of **Hazera's best varieties** across a wide range of crops. In addition, we're excited to share the full Limagrain portfolio with varieties from HM.Clause and Vilmorin-Mikado.

As you walk through our field, you will discover our refreshed brand which better reflects our long-standing legacy of experience and expertise. Our commitment remains the same: growing together with you, our partners and customers around the world.

We wish you a fruitful and a very enjoyable visit.

RED CABBAGE

FIELD 101

Rozera

Plant distance: 50 x 50 cm
Transplanting date: May 17, 2024

- Variety for long storage
- Deep red external and internal colour
- Thick waxy layer
- Maturity: 140 days

FIELD 102

Redguard HM•CLAUSE

Plant distance: 50 x 60 cm
Transplanting date: May 17, 2024

- Late variety
- Suitable for long storage
- 2-3 kgs heads
- Good quality and color
- An excellent storage variety for fresh market
- Maturity: 130 days

FIELD 103

Rovite

Plant distance: 50 x 70 cm
Transplanting date: May 28, 2024

- Processing variety with high yield potential
- Short core and fine internal structure
- Maturity: 120 days

FIELD 104

Rondale

Plant distance: 50 x 40 cm
Transplanting date: June 21, 2024

- High round heads with a good red colour both internal and external
- Quick maturing variety for fresh market
- Maturity: 90 days
- HR: FoC

FIELD 105

Romanov

Plant distance: 50 x 40 cm
Transplanting date: June 21, 2024

- High yield quick maturing variety
- High round heads with a good internal colour
- Maturity: 85 days

FIELD 118

Roadie (34-305)

Plant distance: 50 x 40 cm
Sowing date: July 8, 2024

- Round shaped heads
- Combination of vigor and earliness
- Maturity: 75 days
- HR: FoC

HIGHLIGHT

FIELD
120

Roadster (13-552)

Plant distance: 50 x 40 cm
Transplanting date: July 11, 2024

- Round shaped heads
- Very early maturing with good heat tolerance
- Maturity: 70 days
- HR: FoC

FIELD
119

Romus

Plant distance: 50 x 40 cm
Transplanting date: July 8, 2024

- Good heat tolerance
- Quick maturing red cabbage variety for fresh market
- Maturity: 70 days

HIGHLIGHT

FIELD
109 + 115

Pepito (34-444)

Plant distance: 8 x 4 cm
Sowing date: August 23 & 30, 2024

- Farmer friendly, very reliable variety for sowing from March till end of August (recommendation for Northern Europe)
- Consistent round shape under different weather conditions
- Suitable for both bunching and pre-packing
- Strong thick foliage with good length

FIELD
106

Varda

Plant distance: 8 x 4 cm
Sowing date: August 23, 2024

- Early open pollinated red round variety
- Recommended for year-round production

FIELD
107 + 113

Prelito

Plant distance: 8 x 4 cm
Sowing date: August 23 & 30, 2024

- Early red round hybrid for spring and autumn outdoor production
- Bright red colour bulbs of very good internal quality, good tolerance to cracking
- Medium well attached leaves
- Very good to cracking under standard growing conditions

FIELD
108 + 114

Melito

Plant distance: 8 x 4 cm
Sowing date: August 23 & 30, 2024

- Red round variety for sowing from mid March till end of August (based on Northern Europe conditions)
- Very uniform bulbs with fine tail
- Flexible, farmer friendly for both bunching and pre-packing

RADISH

FIELD
110 + 116

Diego

Plant distance: 8 x 4 cm
Sowing date: August 23 & 30, 2024

- Red round radish for the all-season outdoor production
- Suitable for pre-packing, bunching and processing
- Uniform bulbs, tolerant to pithiness and cracking
- Outstanding internal quality

FIELD
111 + 117

Purpella

Plant distance: 8 x 4 cm
Sowing date: August 23 & 30, 2024

- Round purple radish for both indoor and outdoor production
- Recommended for year-round production
- Suitable for bunching and pre-packing
- Intensive purple colour of the bulb
- Superb internal quality and high tolerance to cracking
- Same earliness as Hazera white and red varieties
- Easy to mix

FIELD
112

Resito (34-305)

- Red round variety for full season outdoor production
- Robust and healthy foliage
- Bright red colour, also after washing
- Very strong to cracking
- Keeps the round shape through the season

HIGHLIGHT

FIELD
112

Resito (34-305)

- Red round variety for full season outdoor production
- Robust and healthy foliage
- Bright red colour, also after washing
- Very strong to cracking
- Keeps the round shape through the season

FIELD 121

Constable HM•CLAUSE

Plant distance: 50 x 35 cm
Transplanting date: July 24, 2024

- 55-60 days cycle, for spring season
- Very round and heavy 1 to 1,5 kgs heads with a nice internal structure
- Ultra early variety to be the first on the market
- Very uniform harvest, good holding ability
- Heads have a green attractive colour

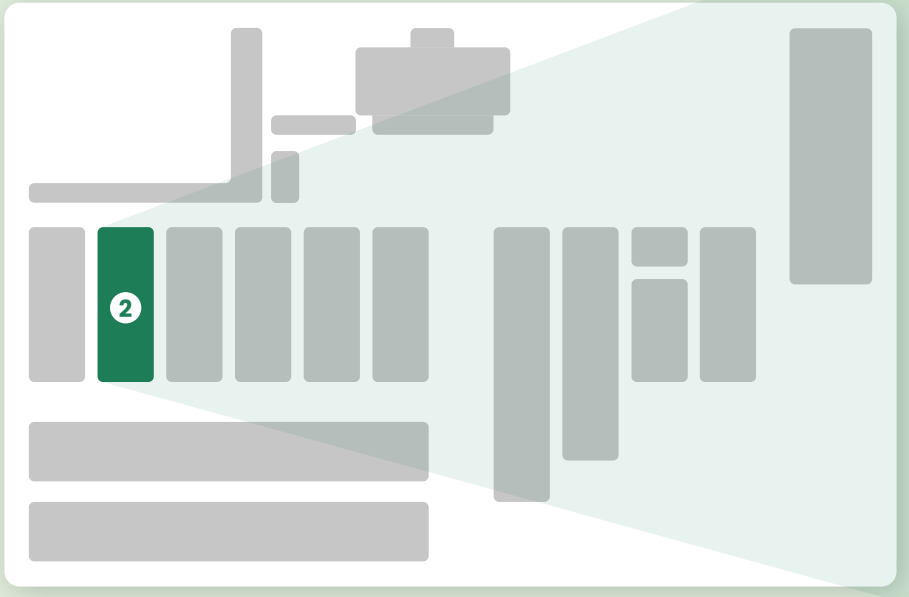

FIELD 122

17-1981

Plant distance: 50 x 35 cm
Transplanting date: July 24, 2024

- White cabbage
- Early white cabbage variety for production under fleece cover
- Round, green heads, with smooth external appearance
- Maturity: 65 days

WHITE CABBAGE

FIELD 201

Magnus Cresco

Plant distance: 50 x 35 cm
Transplanting date: July 17, 2024

- Early maturing, high yielding cabbage
- Performs well when grown under fleece cover
- Relatively strong field holding ability
- Maturity: 65 days

FIELD 202

Carrera

Plant distance: 50 x 35 cm
Transplanting date: July 17, 2024

- Spring variety for open field production
- Round, green, smooth heads
- Maturity: 60 days

FIELD 203

17-1757

Plant distance: 50 x 35 cm
Transplanting date: July 11, 2024

- Spring variety for production in the open field
- Dark green color
- Maturity: 70 days

FIELD 204

Bourbon

Plant distance: 50 x 40 cm
Transplanting date: July 11, 2024

- Flexible variety for open field production in spring
- Good field holding abillity
- Maturity: 70 days

FIELD 205

Cabbice

Plant distance: 50 x 40 cm
Transplanting date: July 11, 2024

- Uniform easy growing summer variety
- Good yield potential and strong against cracking
- Maturity: 80 days
- HR: FoC

FIELD 206

Cali

Plant distance: 50 x 40 cm
Transplanting date: July 11, 2024

- Dense, compact and uniform heads for summer production
- Very attractive dark green smooth heads
- Maturity: 75 days
- HR: FoC

WHITE CABBAGE

FIELD 207

Callaway

Plant distance: 50 x 50 cm
Transplanting date: July 11, 2024

- Flat shaped variety with compact heads
- Maturity: 85 days
- HR: FoC

FIELD 208

Cataleya

Plant distance: 50 x 50 cm
Transplanting date: July 11, 2024

- Flat variety with loose internal structure
- Very volumous heads, with flexible smooth leaves
- Maturity: 85 days
- HR: FoC

FIELD 209

Bravo HM•CLAUSE

Plant distance: 50 x 40 cm
Transplanting date: July 2, 2024

- 90-100 days cycle
- Round and blue-green 2 to 3 Kgs heads with a fine and medium dense internal structure
- A multipurpose cabbage variety with a short core
- Very adaptable to different environments
- Vigorous plant
- HR: FoC

FIELD 210

Mozart

Plant distance: 50 x 40 cm
Transplanting date: June 28, 2024

- Flexible variety for summer production
- Suitable for fresh market and processing
- Maturity: 80 days

HIGHLIGHT

FIELD 211

17-1856

Plant distance: 50 x 40 cm
Transplanting date: June 21, 2024

- Versatile white cabbage for summer/early autumn production
- Suitable for short storage
- Strong against thrips
- Maturity: 100 days
- HR: FoC
- IR: Xcc

FIELD 212

Topcut

Plant distance: 50 x 70 cm
Transplanting date: May 28, 2024

- Very vigorous, flexible variety
- Performs well in counter season production
- Maturity: 100 days
- HR: FoC
- IR: Xcc

FIELD 213

17-1548

Plant distance: 50 x 70 cm
Transplanting date: May 28, 2024

- Very vigorous easy growing variety
- Good heat tolerance
- High yield potential
- Maturity: 100 days
- HR: FoC
- IR: Xcc

FIELD 214

Taurus

Plant distance: 50 x 70 cm
Transplanting date: May 28, 2024

- Flexible high yielding variety
- Strong against thrips
- Good internal structure
- Maturity: 110 days
- HR: FoC
- IR: Xcc

HIGHLIGHT

FIELD 217

Tyson

Plant distance: 50 x 60 cm
Transplanting date: May 17, 2024

- Flexible variety that performs well in the continental summer
- High yield
- Strong against thrips
- Suitable for short to medium storage
- Maturity: 120 days
- HR: FoC
- IR: Xcc

FIELD 215

Newton

Plant distance: 50 x 70 cm
Transplanting date: May 28, 2024

- High yielding variety, with a short core and good internal structure
- Maturity: 100 days
- HR: FoC
- IR: Xcc

FIELD 216

Burton

Plant distance: 50 x 50 cm
Transplanting date: June 4, 2024

- High yield potential
- Suitable for processing
- Short core
- Maturity: 120 days
- HR: FoC

FIELD 218

Brigadier HM•CLAUSE

Plant distance: 50 x 70 cm
Transplanting date: May 17, 2024

- 125-135 days cycle
- Round and large 5 to 7 Kgs heads with thin, dense and white internal structure
- Very good field holding
- High yielding variety
- Excellent head quality
- Maturity: 130 days
- HR: FoC

WHITE CABBAGE

FIELD 219

Zoltan

Plant distance: 50 x 60 cm
Transplanting date: May 17, 2024

- A good combination of yield and storability
- Heavy round heads for medium storage
- Strong against thrips
- Maturity: 130 days
- HR: FoC

FIELD 220

Lucas

Plant distance: 50 x 60 cm
Transplanting date: May 17, 2024

- Medium/long storage variety
- Vigorous plant with high yield potential
- Strong against thrips
- Maturity: 140 days

FIELD 221

Structura

Plant distance: 50 x 60 cm
Transplanting date: May 17, 2024

- Vigorous variety with a strong root system
- High yielding for medium storage/processing
- Maturity: 130 days
- HR: FoC

FIELD 222

Campbell

Plant distance: 50 x 50 cm
Transplanting date: May 17, 2024

- Medium storage variety
- Good heat tolerance
- High yielding and strong against thrips
- Maturity: 130 days
- HR: FoC
- IR: Xcc

FIELD 223

Ramenos

Plant distance: 50 x 50 cm
Transplanting date: May 17, 2024

- Strong variety for long storage
- Very health appearance on the field
- Strong against thrips
- Maturity: 130 days
- HR: FoC
- IR: Xcc

FIELD 224

17-2103

Plant distance: 50 x 50 cm
Transplanting date: May 17, 2024

- Uniform small heading storage cabbage
- Stays within size and performs well in long storage
- Maturity: 140 days
- HR: FoC

WHITE CABBAGE

FIELD 225

Busoni

Plant distance: 50 x 50 cm
Transplanting date: May 17, 2024

- Excellent combination of speed and storage potential
- Maturity: 110 days
- HR: FoC

FIELD 226

Abel

Plant distance: 50 x 50 cm
Transplanting date: May 17, 2024

- Slow growing variety, high on the stem
- Very strong against thrips
- Well suited for long storage
- Maturity: 150 days
- HR: FoC

FIELD 227

Lion

Plant distance: 50 x 50 cm
Transplanting date: May 17, 2024

- Flexible variety for medium storage
- Round, dense heads
- Maturity: 130 days
- HR: FoC

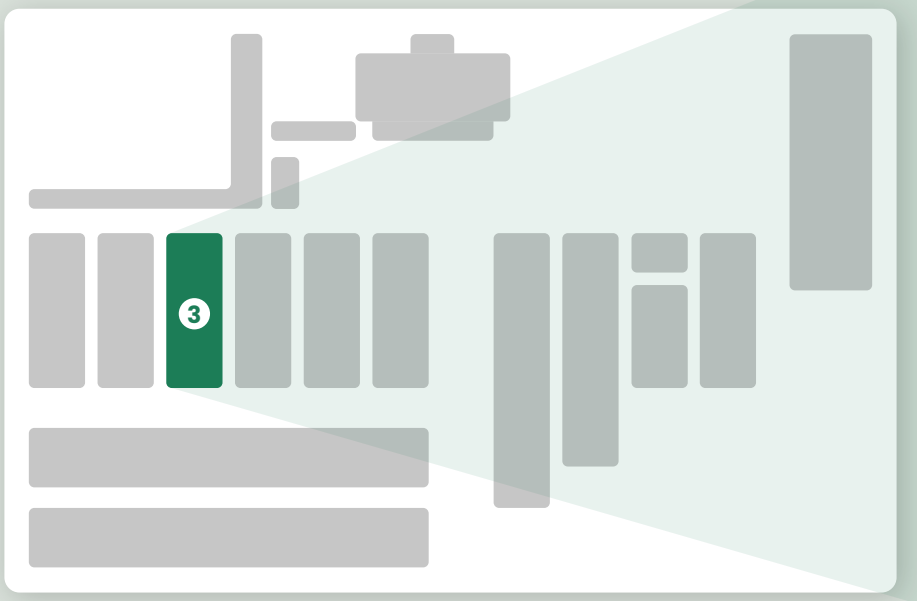

FIELD 228

Carrington

Plant distance: 50 x 40 cm
Transplanting date: May 17, 2024

- Small heading variety for long storage
- Strong against thrips
- The heads stay at the right size depending on the density
- Maturity: 140 days
- HR: FoC

CAULIFLOWER

FIELD
301 + 302

Barcelona

Plant distance: 70 x 56 cm
Transplanting date: July 18 & 24, 2024

- Stable performance with well protected dense, white curds
- Well known variety for early productions

FIELD
303 + 304

Clipper HM•CLAUSE

Plant distance: 70 x 56 cm
Transplanting date: July 11 & 25, 2024

- Excellent blue-green erect foliage
- Very good cover
- White curds with a strong tolerance to splitting and cracking
- Spring production for the earliest plantings

FIELD
305 + 306

10-1517

Plant distance: 70 x 56 cm
Transplanting date: July 11 & 18, 2024

- Spring variety
- Nice combination of vigour and speed
- Good quality curd for spring production
- Maturity 70 days after transplanting

FIELD
307 + 308 + 321

10-0869

Plant distance: 70 x 56 cm
Transplanting date: July 11 & 18 & 24, 2024

- Very uniform harvest maturity
- Vigorous early summer variety
- Maturity: around 70 days after transplanting

FIELD
324 + 325 + 326

Sigurd HM•CLAUSE

Plant distance: 70 x 56 cm
Transplanting date: June 29 & July 8 & 11, 2024

- 80-85 days cycle for summer/early autumn production
- Good tolerance to heat with nice cover and clean bottom

FIELD
322 + 323

Chassiron HM•CLAUSE

Plant distance: 70 x 56 cm
Transplanting date: July 1 & 8, 2024

- 85-90 days cycle for summer/autumn production
- Nice medium sized florets, possible to use for fresh market and industry
- Good vigour
- Heavy, white and firm curd, well covered

HIGHLIGHT

CONTACT MAP

FIELD
327 + 328

10–1283

Plant distance: 70 x 56 cm
Transplanting date: July 11 & 18, 2024

- Late spring variety, with an upright plant habit
- Good bottom quality

HIGHLIGHT

FIELD
312

14-712

Plant distance: 50 x 50 cm
Transplanting date: June 3, 2024

- The combination of FoC and Xcc resistance make this variety stand out
- Very dark green blistered heads
- Maturity: 130 days
- HR: FoC
- IR: Xcc

FIELD
310 + 311

Capriccio

HM•CLAUSE

Plant distance: 50 x 50 cm
Transplanting date: July 1 & 8, 2024

- 90-100 days cycle round head with fine blistered leaves and dark colour
- 1-2 kgs heads with good density
- Very uniform and consistent variety
- Very attractive final product

FIELD
313

Serpentine

Plant distance: 50 x 50 cm
Transplanting date: June 3, 2024

- Early maturing savoy cabbage with good yield potential
- Maturity: 110 days

FIELD
314

Jaspis

Plant distance: 50 x 50 cm
Transplanting date: June 3, 2024

- Nice plant habit protecting the head
- Vigorous plant with compact dark green heads
- Maturity: 120 days
- IR: Xcc

SAVOY CABBAGE

FIELD 315

Spinel

Plant distance: 50 x 50 cm
Transplanting date: June 3, 2024

- Flexible variety that holds well in winter
- Large heads
- Maturity: 150 days
- IR: Xcc

FIELD 316

Tourmaline

Plant distance: 50 x 50 cm
Transplanting date: June 3, 2024

- Very attractive
- Compact dark green heads which are fine blistered
- Maturity: 150 days
- IR: Xcc

FIELD 317

Supervoy

Plant distance: 50 x 50 cm
Transplanting date: June 3, 2024

- Vigorous variety for harvest in December-January
- Maturity: 150 days

FIELD 318

Wyberton

Plant distance: 50 x 50 cm
Transplanting date: June 3, 2024

- The compact, dark green, fine blistered heads of this variety present very well
- Good field holding
- Maturity: 140 days

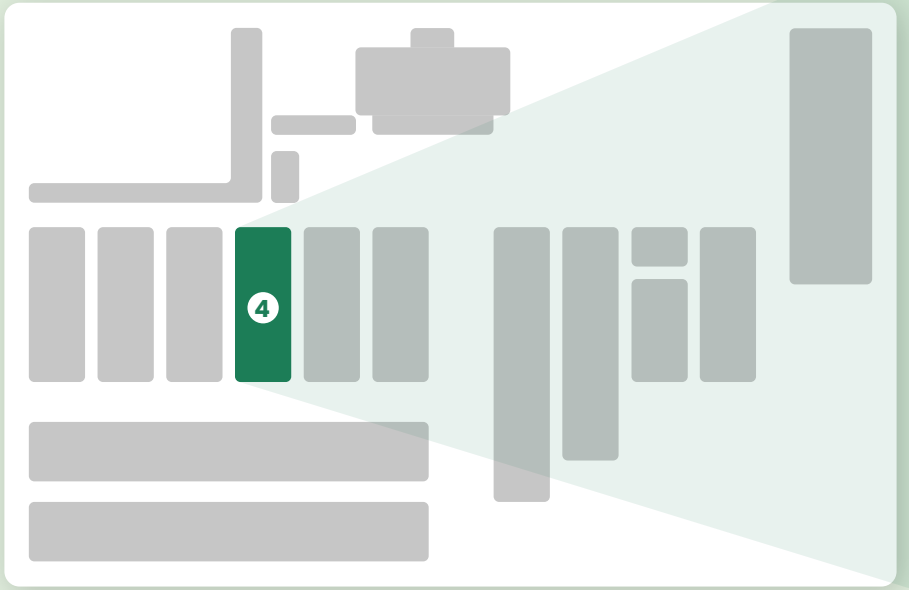

FIELD 319

Rigoleto HM•CLAUSE

Plant distance: 50 x 50 cm
Transplanting date: June 29, 2024

- Round, dark green heads
- 1.5 to 2.0 kg heads
- Very versatile variety
- Good winter hardiness
- Maturity: 150-160 days

FIELD
401 + 402

Tirza

Plant distance: 73 x 50 cm
Transplanting date: July 8 & 24, 2024

- Performs well from early summer until early autumn
- Flexible summer variety
- Good cover and quality curd
- Around ± 75 days maturity from transplanting

FIELD
403 + 404 + 405

10-1571

Plant distance: 73 x 50 cm
Transplanting date: July 2 & 8 & 15, 2024

- Experimental summer, early autumn hybrid
- Variety is healthy and develops a good self cover and nice tuck
- Very strong against tip burn
- Maturity: 70-75 days

FIELD
406 + 407

Thalassa HM•CLAUSE

Plant distance: 73 x 50 cm
Transplanting date: July 8 & 11, 2024

- 90-95 days cycle, for late summer/early autumn variety for September/early October harvest
- A very uniform curd for the fresh market
- Good tolerance to heat

HIGHLIGHT

FIELD
419 + 420 + 421

Eldir HM•CLAUSE

Plant distance: 73 x 50 cm
Transplanting date: July 2 & 8 & 11, 2024

- Vigorous, upright foliage with long, fluted leaves providing an ideal level of cover
- Smooth bowl
- Produces dense, white curds, even in stressful conditions

FIELD
408 + 409

Seoul

Plant distance: 73 x 50 cm
Transplanting date: July 3 & 11, 2024

- Produces very heavy dense curds with small florets
- For fresh market and industry (deepfreeze and loose florets)
- Strong erect foliage

FIELD
422 + 423 + 424

Raft HM•CLAUSE

Plant distance: 73 x 50 cm
Transplanting date: July 2 & 8 & 24, 2024

- 80-85 days cycle for summer/autumn production
- Very flexible and reliable
- Vigorous plants with good self covering
- White curd
- Very healthy plants
- For both fresh and processing

FIELD
416 + 417 + 418

Ferrara

Plant distance: 73 x 50 cm
Transplanting date: July 11 & 17 & 24, 2024

- Well suited for production in summer and early autumn
- Smooth head with strong base
- Suitable for fresh market
- Good heat tolerance
- Very stable maturity ± 75 days

FIELD
414 + 415

Durok HM•CLAUSE

Plant distance: 73 x 50 cm
Transplanting date: June 29 & July 8, 2024

- New cauliflower for the industry
- Good vigor and extreme solid florets
- Very grouped harvest
- Maturity 90-95 days

HIGHLIGHT

HIGHLIGHT

FIELD 501

16-944

Plant distance: 70 x 36 cm
Transplanting date: May 1, 2024

- Tall vigorous stems, uniform sprout setting
- Strong against wear out
- Early maturing fresh market sprout

FIELD 502

Brilliant

Plant distance: 70 x 36 cm
Transplanting date: May 13, 2024

- A flexible reliable producer
- Very early maturing and high yielding fresh market variety

FIELD 503

16-995

Plant distance: 70 x 36 cm
Transplanting date: May 14, 2024

- Suitable for November harvest
- Very strong against wear out on the field
- Vigorous plant with high number of sprouts on the stalk

FIELD 504

Brigitte

Plant distance: 70 x 36 cm
Transplanting date: May 14, 2024

- Cylindrical sprout setting, good field holding ability
- Fresh market variety for November harvest

FIELD **505**

16-972

Plant distance: 70 x 36 cm
Transplanting date: May 14, 2024

- Suitable for fresh and processing
- Uniform plant with cylindrical sprout setting
- Easy growing November variety

FIELD **506**

Brechin

Plant distance: 70 x 36 cm
Transplanting date: May 14, 2024

- High number of sprouts on the stem
- Strong against light leaf spot
- Variety is suitable for December/January harvest

FIELD **507**

16-963

Plant distance: 70 x 36 cm
Transplanting date: May 14, 2024

- Vigorous, tall plant with a high number of sprouts on the stalk
- Strong against light leaf spot
- January/February variety

HIGHLIGHT

FIELD **508 + 509**

Cancarix

Plant distance: 60 x 56 cm
Transplanting date: July 1 & 8, 2024

- Flexible counter season variety, harvest from January to March
- Showing good vigour with an upright plant habit and is strong against hairiness and riceyness
- Produces high quality curds in different conditions

HIGHLIGHT

HIGHLIGHT

FIELD **516**

Amo125 HM•CLAUSE

Plant distance: 70 x 50 cm
Transplanting date: June 29, 2024

- First orange romanesco on the market
- Cycle between 110 and 115 days for winter harvest

FIELD **517**

Yurok Vilmorin

Plant distance: 70 x 50 cm
Transplanting date: July 17, 2024

- Uniform hybrid, deeply savoyed dark green leaves
- Compact leaves with uniform size
- Good bolting tolerance

FIELD
515

Trevi HM•CLAUSE

Plant distance: 55 x 50 cm
Transplanting date: July 3, 2024

- Green cauliflower
- Versatile variety with uniform production and grouped harvest
- Very good curd quality
- 85-90 days for autumn harvest

FIELD
510 + 511 + 512

Phar Lap HM•CLAUSE

Plant distance: 55 x 50 cm
Transplanting date: July 24 & 29 & August 1, 2024

- Extremely dome shape, heavy & dense with excellent field-holding and harvest uniformity
- Spring - early summer type

HIGHLIGHT

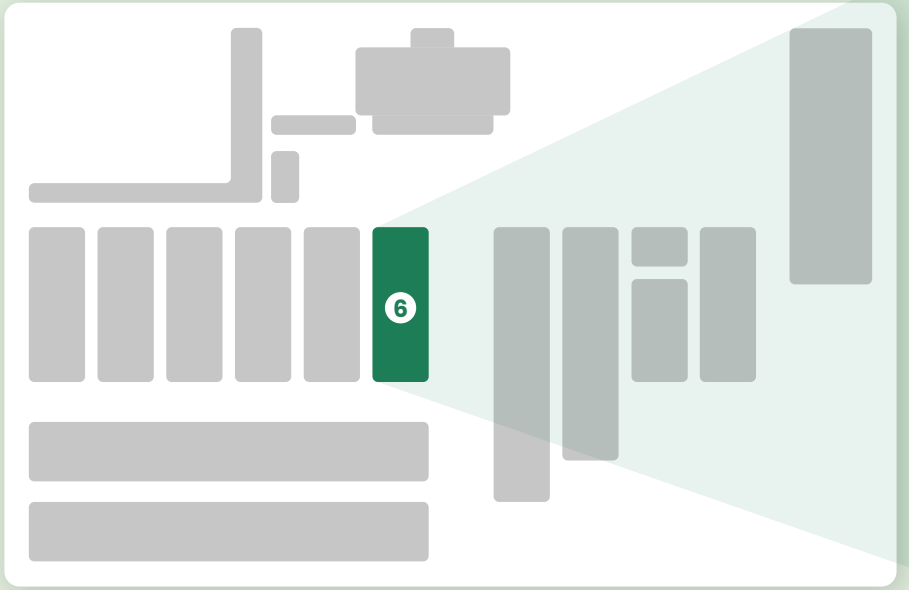

FIELD
513 + 514

First Lap HM•CLAUSE

Plant distance: 55 x 50 cm
Transplanting date: July 24 & 29, 2024

- Well-domed & firm & heavy heads for this segment
- Early maturity for spring harvests only

POINTED CABBAGE

FIELD
601 + 602

Regency

Plant distance: 50 x 40 cm
Transplanting date: July 25 & August 1, 2024

- Summer variety, works well from spring to autumn
- Very cone shaped heads
- Maturity: 65 days

FIELD
603 + 604

Marquess

Plant distance: 50 x 40 cm
Transplanting date: July 18 & 25, 2024

- Quick maturing autumn variety
- Performs well as a second crop
- Uniform and cone shaped
- Maturity: 80 days

FIELD
607 + 608

Dutchman

Plant distance: 50 x 40 cm
Transplanting date: July 18 & 25, 2024

- Uniform summer variety
- Cone shaped heads
- Maturity: 65 days

HIGHLIGHT

FIELD
605 + 606

Earl (15-1075)

Plant distance: 50 x 40 cm
Transplanting date: July 18 & 25, 2024

- High yielding summer variety
- Very uniform healthy plant
- Maturity: 70 days

POINTED CABBAGE

FIELD
609 + 610

Berlenga

Plant distance: 50 x 40 cm
Transplanting date: July 18 & 25, 2024

- Uniform with good field holding
- High yielding summer variety
- Maturity: 75 days

FIELD
625 + 626

Baron (15-1110)

Plant distance: 50 x 40 cm
Transplanting date: July 18 & 25, 2024

- Vigorous healthy plant
- Good field holding
- Autumn production
- Short storage
- Vigorous autumn variety
- Suitable for storage in Ca cold stores until January
- Maturity: 75 days

FIELD
627 + 628

Houdini

Plant distance: 50 x 40 cm
Transplanting date: July 18 & 25, 2024

- Summer and autumn variety with good field holding capabilities
- Very domed attractive looking heads
- Maturity: 80 days

FIELD
629 + 630

Monarchy

Plant distance: 50 x 40 cm
Transplanting date: July 11 & 18, 2024

- Vigorous autumn variety
- Can be used for late plantings to extend the season
- Maturity: 80 days

FIELD
631 + 632

Winterjewel

Plant distance: 50 x 35 cm
Transplanting date: July 8 & 15, 2024

- Springgreen variety for spring production
- Non hearting uniform variety
- Maturity: 90 days

FIELD
633 + 634

Summerjewel

Plant distance: 50 x 35 cm
Transplanting date: July 8 & 15, 2024

- Springgreen variety for summer production
- Slow hearting with smooth leaves
- Maturity: 70 days

FIELD
611 + 624

HMC35993 HM•CLAUSE

Plant distance: 50 x 50 cm
Transplanting date: July 8 & 11, 2024

- Sprouting variety - all year round production
- High tolerance to premature bolting with uniform & productive flushes of side shoots and high quality and long stem

FIELD
612 + 613

Koros HM•CLAUSE

Plant distance: 50 x 55 cm
Transplanting date: July 18 & 25, 2024

- Excellent head quality with Dark-blue green & very dense and uniform beads
- Adopted for early autumn

FIELD
614 + 615

Stromboli

Plant distance: 50 x 55 cm
Transplanting date: July 18 & 25, 2024

- Vigorous spring variety
- Small beads and dark green head

FIELD
616 + 617

Kuba HM•CLAUSE

Plant distance: 50 x 55 cm
Transplanting date: July 15 & 18, 2024

- Summer - early autumn type
- Excellent head colour (blue-green), very dense with fine beads + good harvesting efficiency

FIELD
618 + 619

Babilon HM•CLAUSE

Plant distance: 50 x 55 cm
Transplanting date: July 11 & 15, 2024

- Excellent head quality with (bluish colour & smooth dome), yield and harvest concentration
- Late summer and autumn type
- IR: Mildew

FIELD
620 + 621

HMC35536 HM•CLAUSE

Plant distance: 50 x 55 cm
Transplanting date: July 11 & 15, 2024

- High head quality and yield with good uniformity
- Summer - autumn type
- IR: Mildew

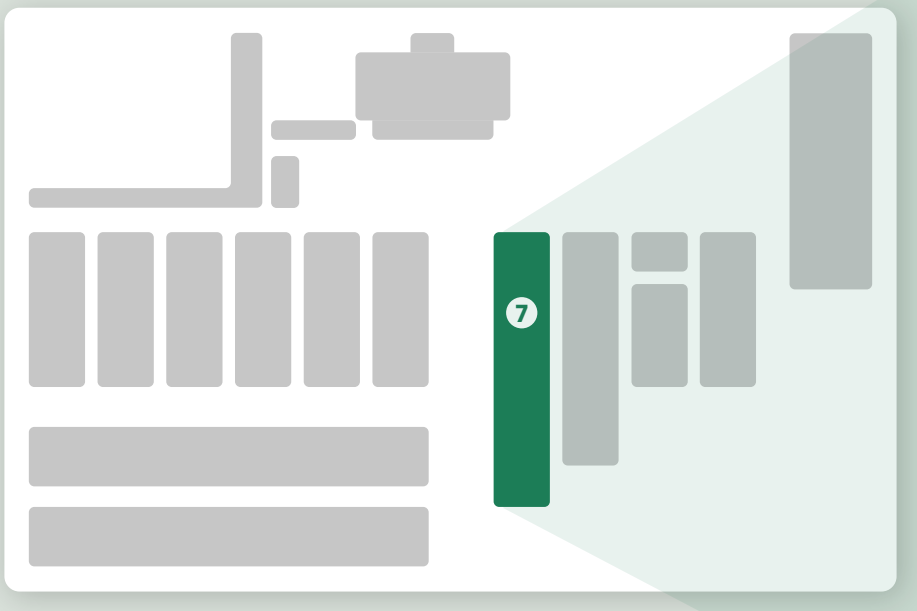

FIELD
622 + 623

9376 HM•CLAUSE
(Under Development)

Plant distance: 50 x 55 cm
Transplanting date: July 8 & 15, 2024

- High head position (easy of harvest) + well-domed, heavy head with good field holding
- Full summer type

HIGHLIGHT

FIELD
709 + 710

Magaly HM•CLAUSE

Plant distance: 40 x 36 cm
Transplanting date: August 2 & 8, 2024

- Very erect plant and good bolting tolerance
- Works well form late spring to autumn
- Good behavior against tipburn

FIELD
711 + 712

Minelly HM•CLAUSE

Plant distance: 40 x 36 cm
Transplanting date: August 2 & 8, 2024

- Well adapted to spring and autumn production
- Vigorous, very versatile variety
- High bolting and tip burn resistance
- Very nice serated leaves in the heart, high yield potential

FIELD
713 + 714

Marjory HM•CLAUSE

Plant distance: 40 x 36 cm
Transplanting date: August 2 & 8, 2024

- Can be grown from spring to early autumn, according to the production area
- High percentage of yellow parts
- Flexible with high net yield and has very good bolting tolerance

FIELD
718

Vasari HM•CLAUSE

Plant distance: 40 x 25 cm
Transplanting date: July 24, 2024

- Fennel
- New hybrid for spring/summer production
- High bolting tolerance
- Very good bulb quality
- High yield potential

FIELD 719

Bellotto HM•CLAUSE

Plant distance: 40 x 25 cm
Transplanting date: July 24, 2024

- Hybrid for spring/summer production
- Good earliness and bulb quality
- High bolting tolerance

FIELD 721 + 744

Nemesis HM•CLAUSE

Plant distance: 40 x 25 cm
Transplanting date: June 21 & July 8, 2024

- Versatile variety producing long straight ribs
- Good field holding
- High yield
- Low fibrosity
- Rather dark color

FIELD 730

Mirza HM•CLAUSE

Plant distance: 140x 65 cm
Transplanting date: July 26, 2024

- Short internodes
- Productive, Vigorous
- Upright habit
- Strong against lodging
- Nice marbled cylindrical fruit
- IR: Px, ZYMV, WMV

FIELD 731

Camelia HM•CLAUSE

Plant distance: 140 x 65 cm
Transplanting date: July 26, 2024

- Early and productive
- Nice medium green cylindrical fruit
- Strong, rustic, and very healthy plant
- IR: Px, CMV, ZYMV, WMV, PRSV

FIELD 732

Tosca HM•CLAUSE

Plant distance: 140 x 65 cm
Transplanting date: July 26, 2024

- Very flexible variety with a vigorous plant, adapted to plastic tunnels and open field
- Very productive and attractive fruit
- Very early
- IR: Px

FIELD 733

Aloha HM•CLAUSE

Plant distance: 140 x 65 cm
Transplanting date: July 26, 2024

- Easy to pick, due to long and easily breakable peduncle
- Good vigor, very nice upright open plant habit
- IR: Px, ZYMV, WMV, PRSV

FIELD **734**

Lanka HM•CLAUSE

Plant distance: 140 x 65 cm
Transplanting date: July 26, 2024

- Can come into production quickly under proper growing conditions
- Gives potentially long cylindrical fruits
- Variety for the industry
- IR: Powdery mildew, Px, ZYMV, WMV

FIELD **735**

Precioza HM•CLAUSE

Plant distance: 140 x 65 cm
Transplanting date: July 26, 2024

- Straight fruit, flexible harvesting
- High production potential
- Variety for the industry
- IR: Powdery mildew, ZYMV, WMV

FIELD **736**

Tethys HM•CLAUSE

Plant distance: 140 x 65 cm
Transplanting date: July 26, 2024

- Round green squash
- Good plant without branching
- Nice dark green uniform color
- Good resistance with later PX and virus attack
- Small flower scar, giving a nice presentation

FIELD **757 + 758**

Grenade Vilmorin

Plant distance: 33 x 7 cm
Transplanting date: May 24 & June 7, 2024

- Globe shape, medium size, good uniformity
- Fine flesh with dark red colour
- Nice product after cooking
- Very sweet taste, high sugar content
- Semi erected foliage, vigourous leaves, mid early
- IR: *Rhizomania* (BNYVV)

FIELD **759+ 760**

Camaro Vilmorin

Plant distance: 33 x 7 cm
Transplanting date: May 24 & June 7, 2024

- Variety suitable for fresh market and processing
- Globe type
- High yield, well adapted for winter storage
- Excellent colour after cooking
- Erected foliage
- Nice and thin leaves attachment

FIELD
751 + 752

Bonel

Plant distance: 33 x 7 cm
Transplanting date: May 24 & June 7, 2024

- Bulb-shaped variety with intense colour for the fresh market and industry
- Very smooth bulbs with high sugar content
- High bolting tolerance

FIELD
753 + 754

Globe Dark Red

Plant distance: 33 x 7 cm
Transplanting date: May 24 & June 7, 2024

- Early variety for fresh market and storage
- Globe shaped bulbs with intensive internal coloration
- Performs well in very hot summers

FIELD
755 + 756

Redval

Plant distance: 33 x 7 cm
Transplanting date: May 24 & June 7, 2024

- Globe type with high sugar content and dark red flesh
- High yield, good storability for winter
- Very nice color after cooking
- Good taste
- Uniform medium size
- Semi erected foliage
- Mid early
- IR: *Rhizomania* (BNYVV)

FIELD
745

Clovis

Plant distance: 25 x 10 cm
Transplanting date: August 9, 2024

- Hybrid adapted to harvests from spring to autumn
- Very homogeneous root, with very rapid growth and coloring
- Excellent regularity of shape and size

FIELD
746

Plessis

Plant distance: 25 x 10 cm
Transplanting date: August 9, 2024

- Hybrid adapted to fall harvests
- Strong, upright dark green foliage
- White round rave with intense purple shoulder

FIELD **747**

Richelieu HM•CLAUSE

Plant distance: 25 x 10 cm
Transplanting date: August 9, 2024

- Variety for winter harvests. Leading variety in the market
- Excellent homogeneity and product quality (deep purple color)
- Good frost tolerance
- Well adapted for cultivation under insectproof net

FIELD **748**

Vauban HM•CLAUSE (HMC36136)

Plant distance: 25 x 10 cm
Transplanting date: August 9, 2024

- New hybrid for winter and late winter production
- Good foliage behaviour against cold weather
- Very nice dark purple color and excellent storage ability

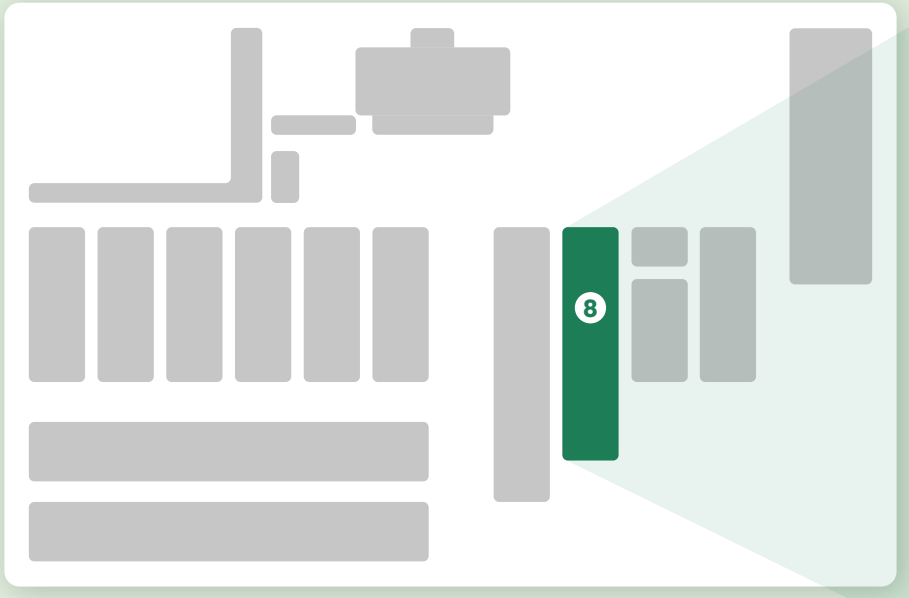

FIELD **749 + 750**

Pict HM•CLAUSE

Plant distance: 40 x 20 cm
Transplanting date: June 28 & July 22, 2024

- Very nice round shape
- Very uniform hybrid swede with yellow flesh
- Strong against Boron deficiency (brown decoloration)

Turbine HM•CLAUSE

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Ideal early season sh2 variety with short days to maturity
- Good tipfill and large ears
- RM: 74 days

FIELD 1002

Mint HM•CLAUSE

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Healthy, dark green plant
- Excellent field yield and processed recovery for more profits
- Tasty for both processing and fresh markets
- IR: Et, MDMV
- RM: 77 days

FIELD 1003

Airlie HM•CLAUSE

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Small shipper yellow corn with amazing uniformity
- Excellent consistency and reliability
- Strong plant
- Superb taste
- RM: 79 days

FIELD 1004

Coachman HM•CLAUSE

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Great for corn on the cob and good recovery numbers in the processing plant
- Strong disease package with a high resistance to rust
- HR: Ps (Rp1-E), Ps (Rp1-GFJ)
- IR: Et, MDMV
- RM: 81 days

FIELD 1005

Sentinel HM•CLAUSE

Plant distance: 75x 20 cm
Transplanting date: June 7, 2024

- Highly adaptable and reliable variety for many markets
- Good taste for high consumer satisfaction
- Straight rowing on a long ear
- IR: Et, Ps (Rp1-D), MDMV
- RM: 83 days

SWEET CORN

FIELD 1006

Raquel HM•CLAUSE

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Raquel is an early bi-color sweet corn with good kernel contrast
- It features a very large ear size with great tip fill, excellent yield potential and high eating quality
- Part of our Quality Elite brand of sweet corn
- RM: 72 days

FIELD 1007

Column Vilmorin (HMC599302)

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- New early sh2 sweet corn for the industry market (RM 74 days)
- Good recovery
- Strong plant with long ears and good hush protection

FIELD 1008

Kamet Vilmorin (HMX59YS825)

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Kamet is an sh2 yellow sweet corn developed for the processing market
- Deep kernels and high yield for more profit
- Nice ear shape and rowing
- Strong dark green plant
- RM: 78 days
- HR: Ps (RP1-e)
- IR: Et, MDMV

FIELD 1009

Kopa Vilmorin

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Season sh2 variety (78 days) with high yield and vigorous plant – ideal for organic production, great resistance to Smut (Um), Virus (MDMV) and common Rust (Ps)
- Good recovery
- Ear: Length: 23 cm, Rows: 18-20

SWEET CORN

FIELD 1010

Kiara

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Season sh2 variety (78 days) with excellent yield in many conditions and field holding, great resistance to Smut (Um), Virus (MDMV) and common Rust (Ps)
- Deep kernels and good recovery
- Ear: Length: 24 cm, Rows: 18-20

FIELD 1011

HMC599305

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- New season sh2 yellow sweet corn variety (79 days) with excellent yield and field holding, great resistance package
- Long ear for triple-cut cobbetts or additional cut kernels
- High yield variety for more profit
- HR: Ps (Rp1-e)
- IR: MDMV

FIELD 1012

Kamuk

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Great resistance to Virus (MDMV) and Common Rust (Ps), large harvest window
- High productivity for the season and late season, vigourous plant
- RM: 83 days sh2
- Ear: Length: 21 cm, Rows: 18

FIELD 1013

Azlan
(SU - processing varieties)

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Azlan has consistently been at the top of our yield and recovery trials the past few years
- Add in a strong disease package and you have a variety that has a huge planting window
- A new SU yellow sweet corn variety that's all about the recovery
- RM: 75 days
- HR: Ps (Rp1-i)
- IR: Et, MDMV

FIELD
1014

Turbo

(SU - processing varieties)

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Turbo is a staple yellow sweet corn variety used globally in the processing market
- Reliable and widely adaptable for planting in a range of locations and slots
- Uniform ear shape and size
- Deep kernel for high recovery
- RM: 76 days
- HR: MDMV, Pst, Ps, Et, Um

FIELD
1015

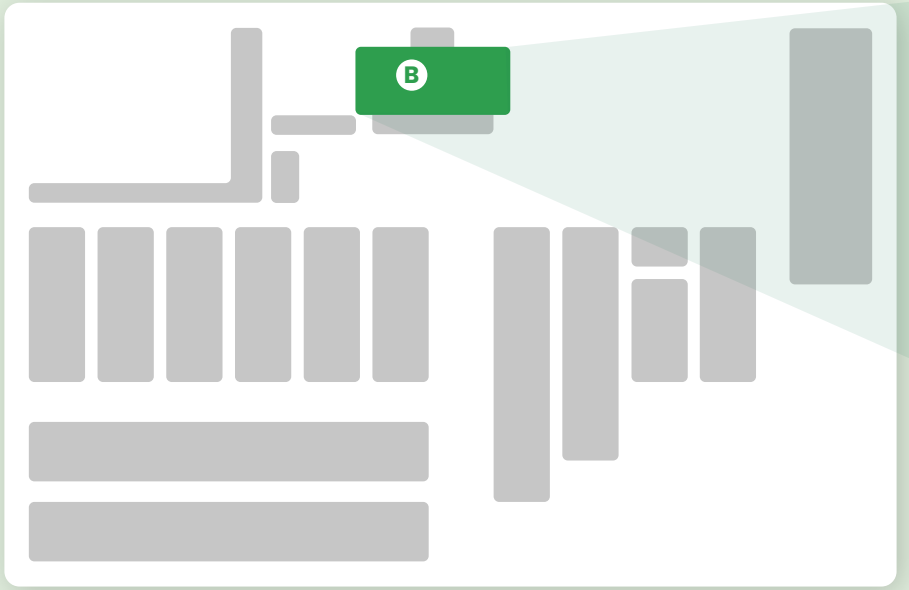

Generator

(SU - processing varieties)

Plant distance: 75 x 20 cm
Transplanting date: June 7, 2024

- Generator is a mid-late yellow sweet corn variety
- Large ears and great ear shape with excellent tip fil
- Full season variety
- Great yield for more profit
- RM: 83 days
- IR: Et, MDMV
